

Yuhan Yao (yy2564) & Xue Bai (xb347)

Yuhan worked on the Public page, all Booking Agent pages, “track my spending” on Customer page, MySQL triggers, user input validation, password hashing, cross-site vulnerability prevention and overall styling.

Xue worked on the login and registration functions, all of the Airline Staff page and all of the Customer page except “track my spending”.

For SQL statements and constraints and testing, we worked together to create views and functions so that both of us can reuse them.
